How to match sky color in different photos ?

Here are two photos I took, but the sky color is different, what are the steps and the edit tools so i can match the sky colors? I edit mostly in Lightroom and use Photoshop when needed. <https://imgur.com/a/5xIJxyo> please also give me feedback on the edit and the composition, that is my best work so far.

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.
